

How to get your App's Google Play ID

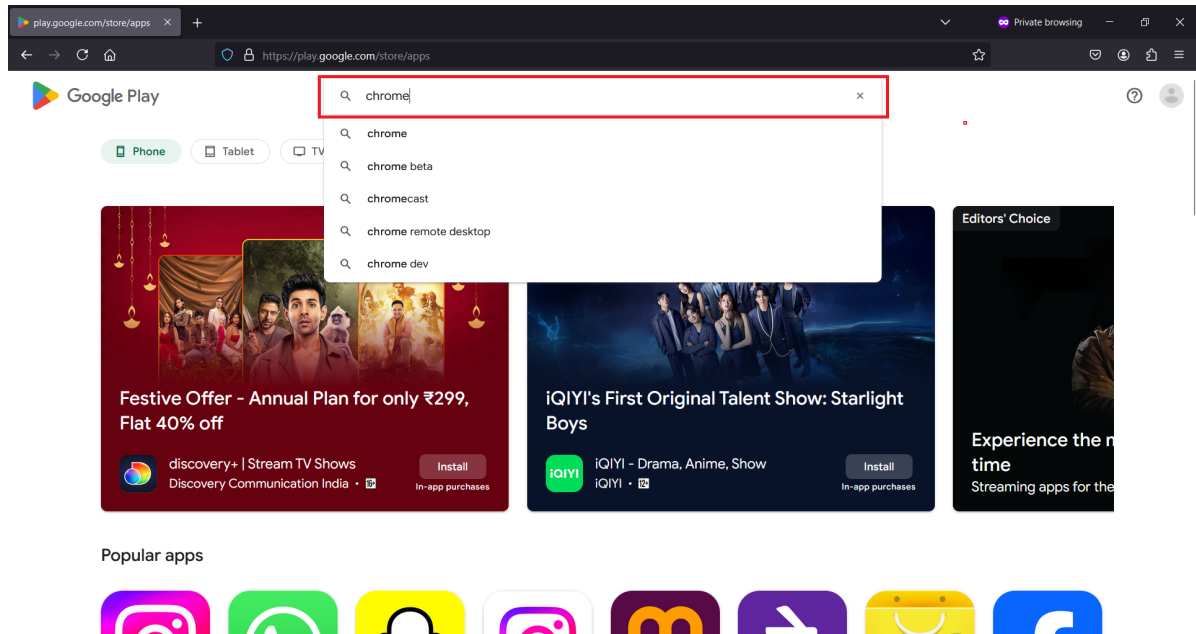

Method 1 - Using Web Browser

Open your browser and navigate to the url

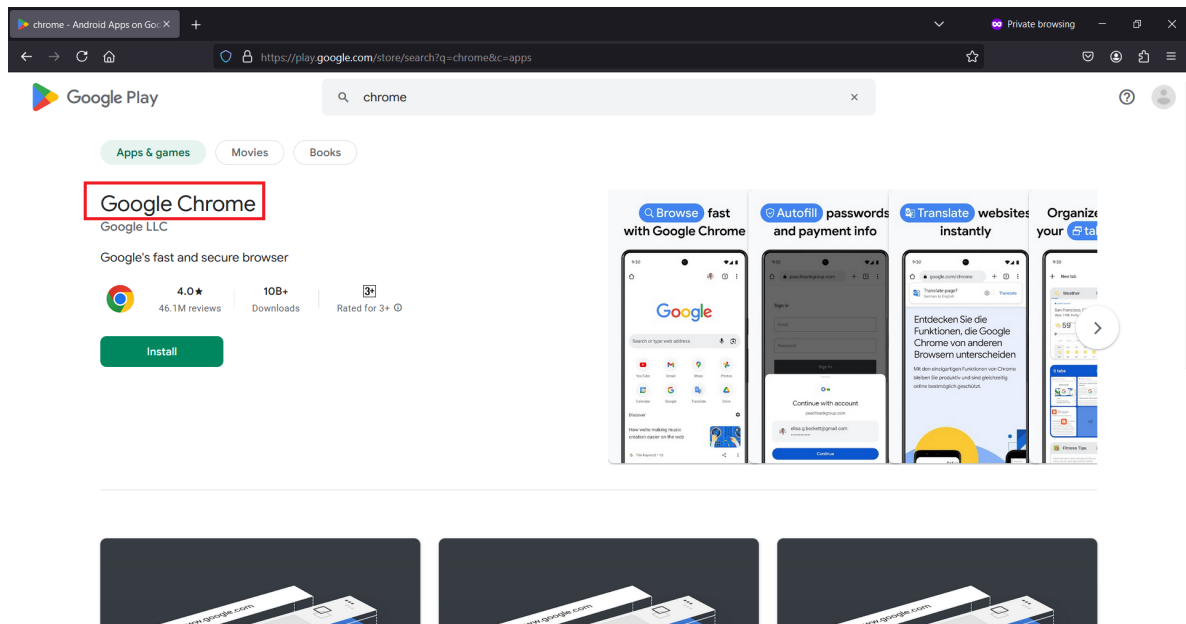

<https://play.google.com/store/apps>

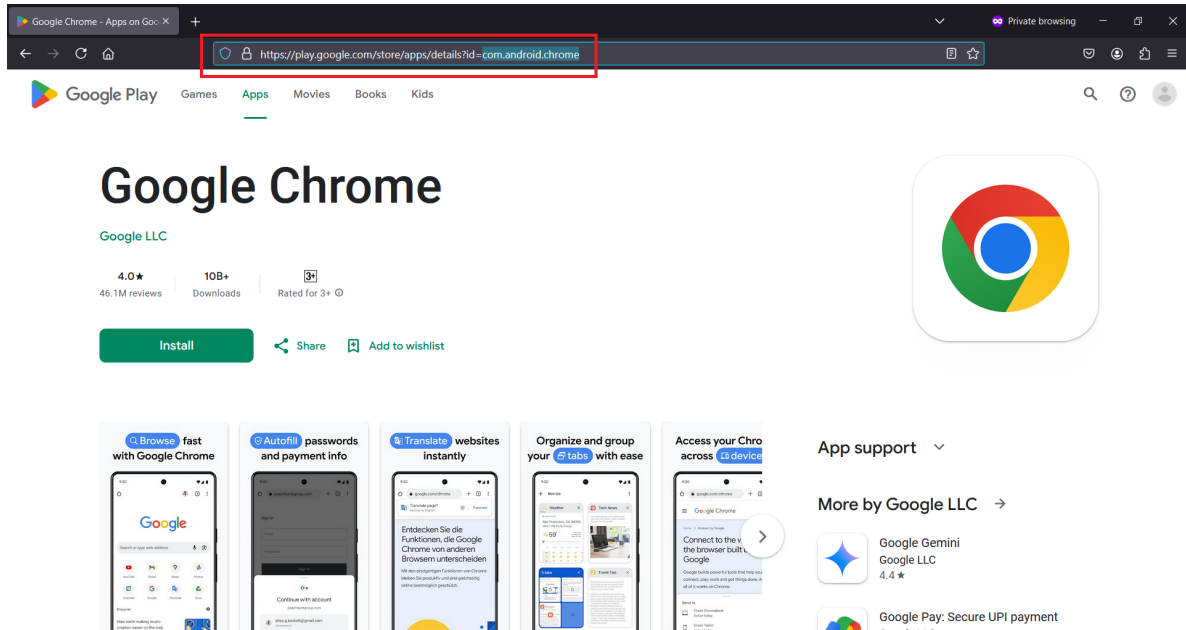

Search your app by name

Click on your App's name to view it

Get your App's ID from the url

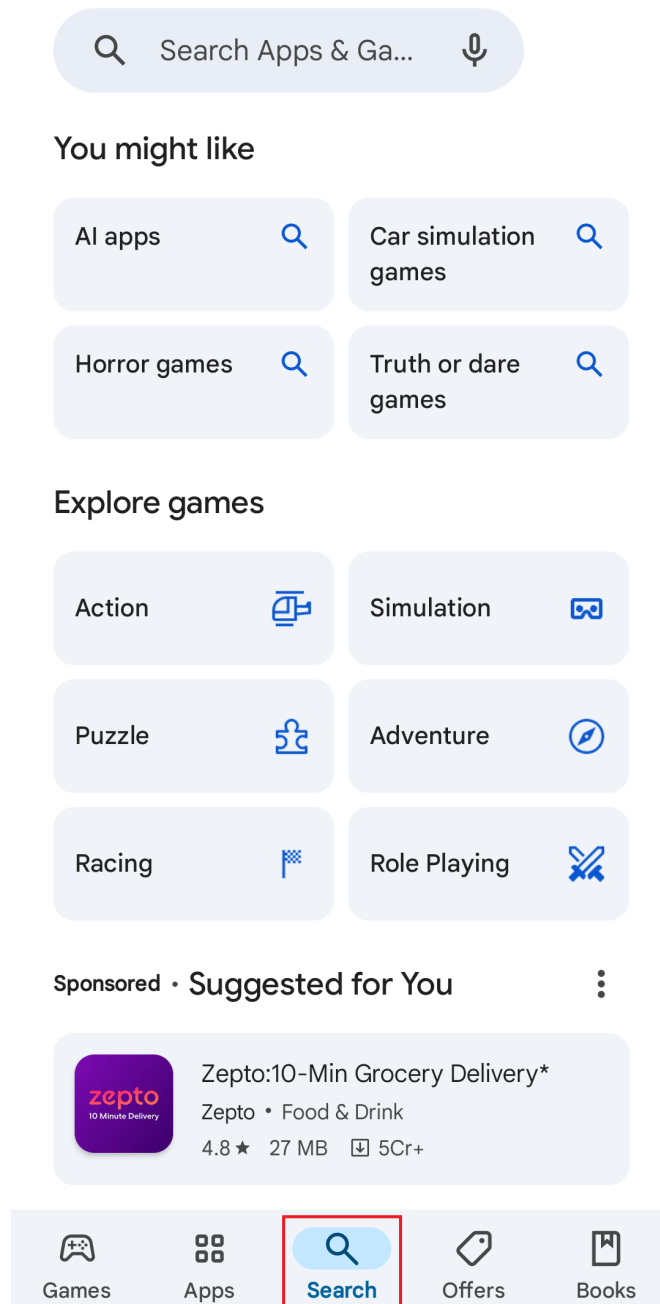

The url will be like “<https://play.google.com/store/apps/details?id=com.android.chrome>”

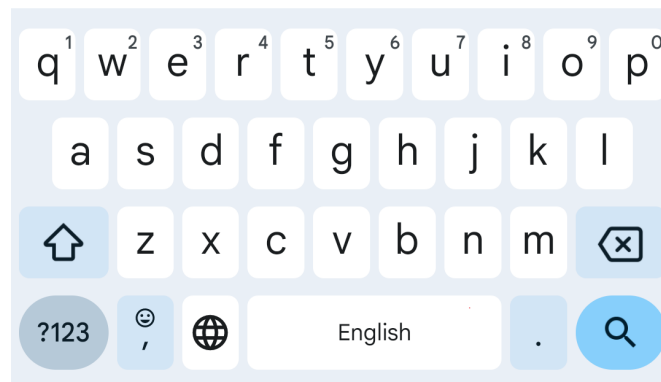

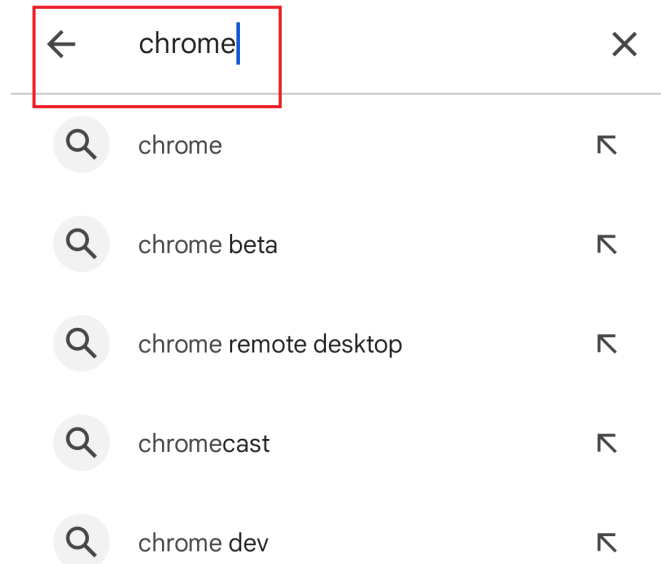

The string that succeeds the “**id=**” keyword is what you should input as App Id in [CustQr's Qr code generator for Playstore App](https://custqr.com)

Method 2 - Using Android Playstore App

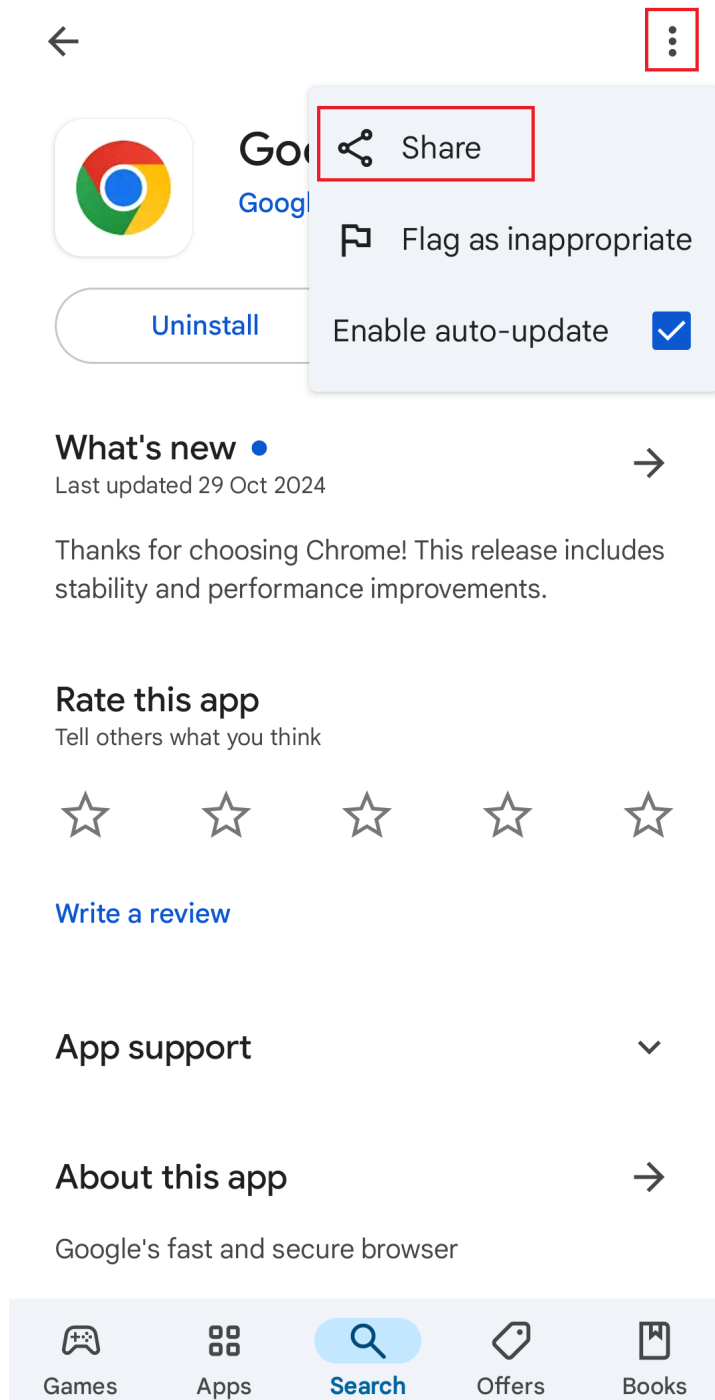

Open Playstore app in your android device

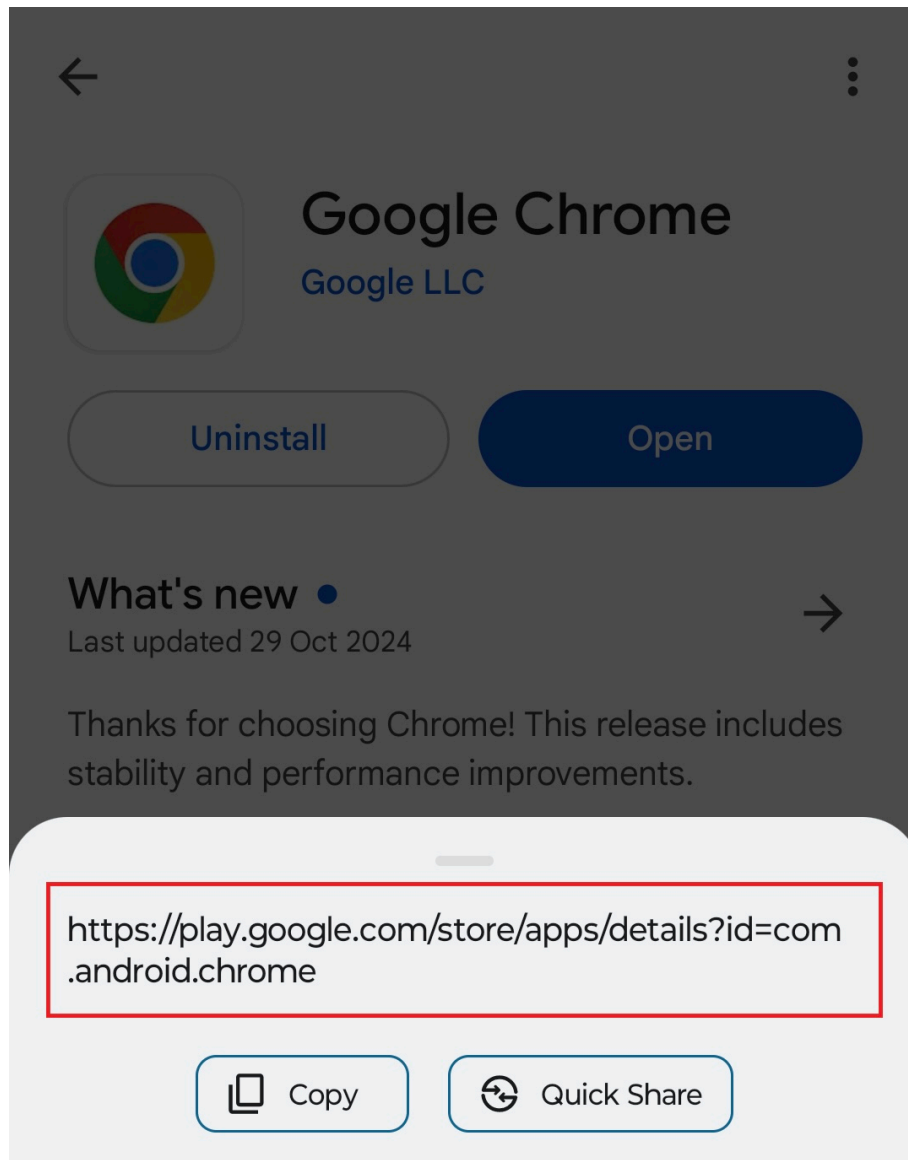

Search your app by name

Click the ellipsis icon in your app's screen and
click Share

Get your App's ID from the share link

The share link will be like “<https://play.google.com/store/apps/details?id=com.android.chrome>”

The string that succeeds the “id=” keyword is what you should input as App Id in [CustQr's Qr code generator for Playstore App](#)
