# How to get your App's App Store ID
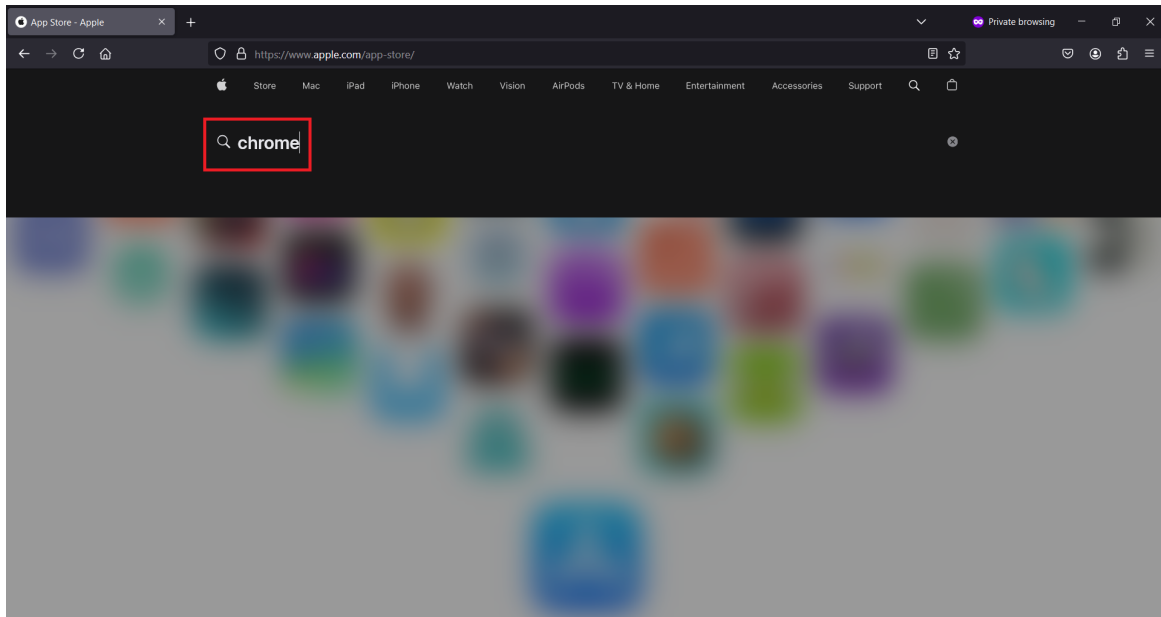

Method 1 - Using Web Browser

Open your browser and navigate to the url

https://www.apple.com/app-store
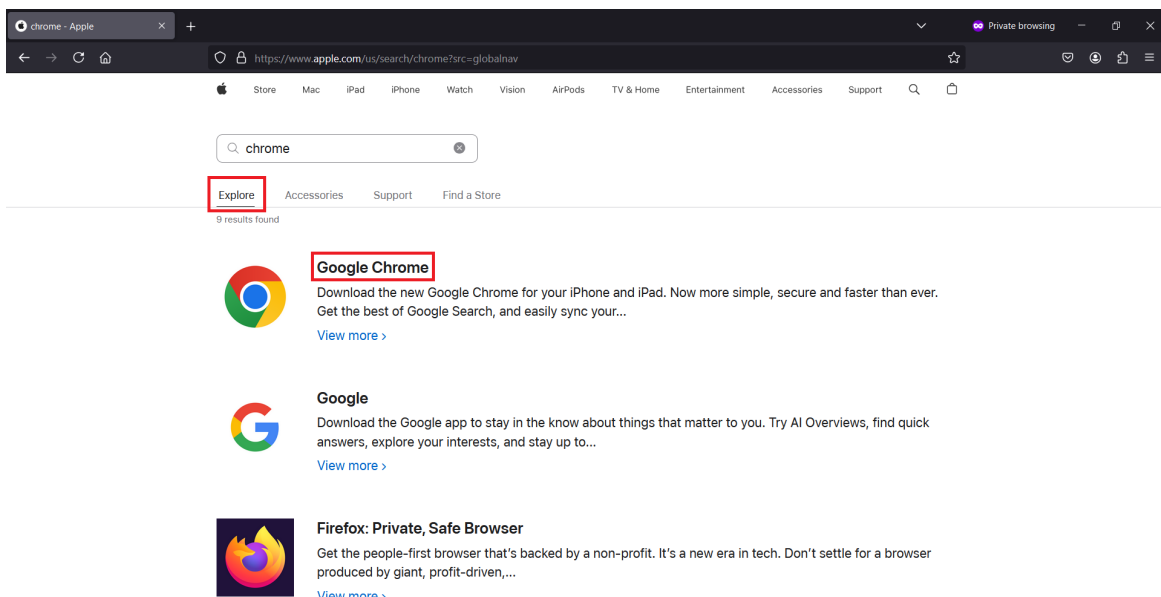

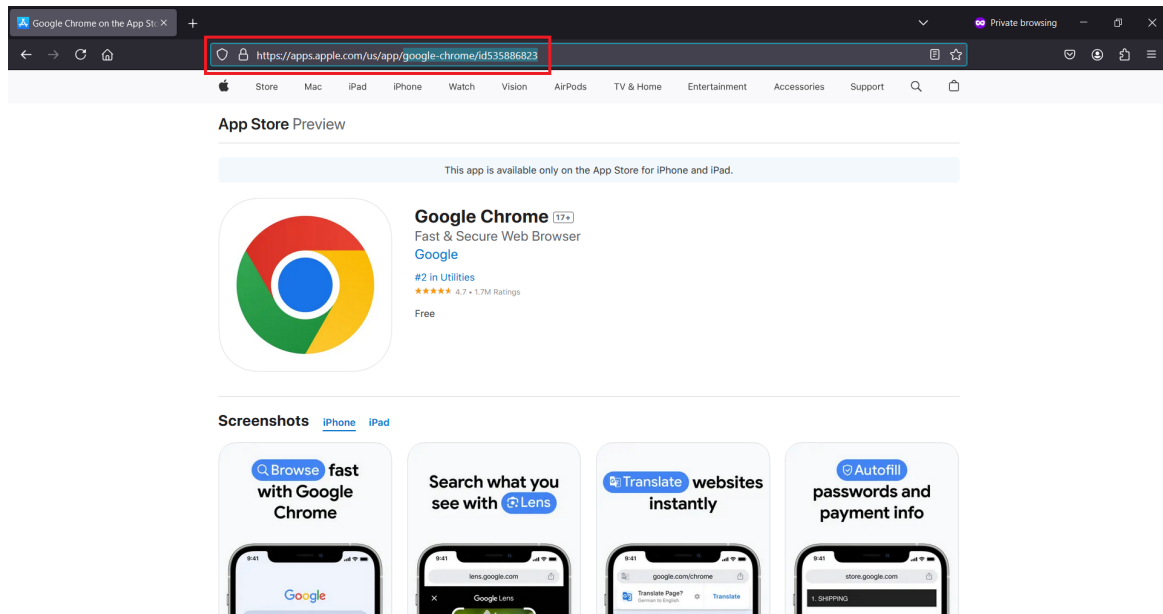

Search your app by name

Click on your App's name under the explore tab to view it
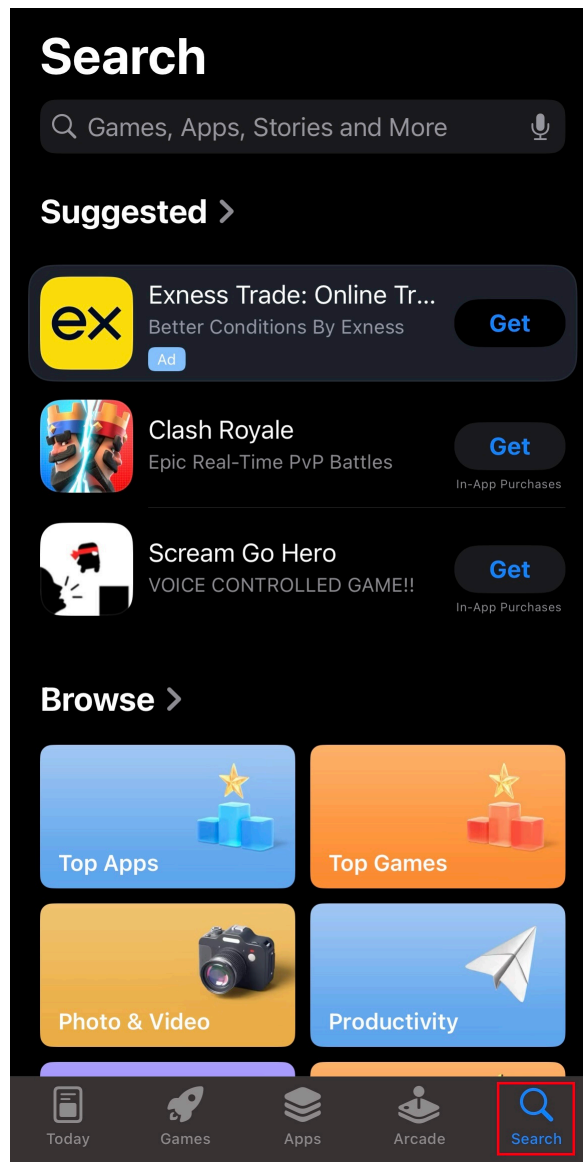

Get your App's ID from the url

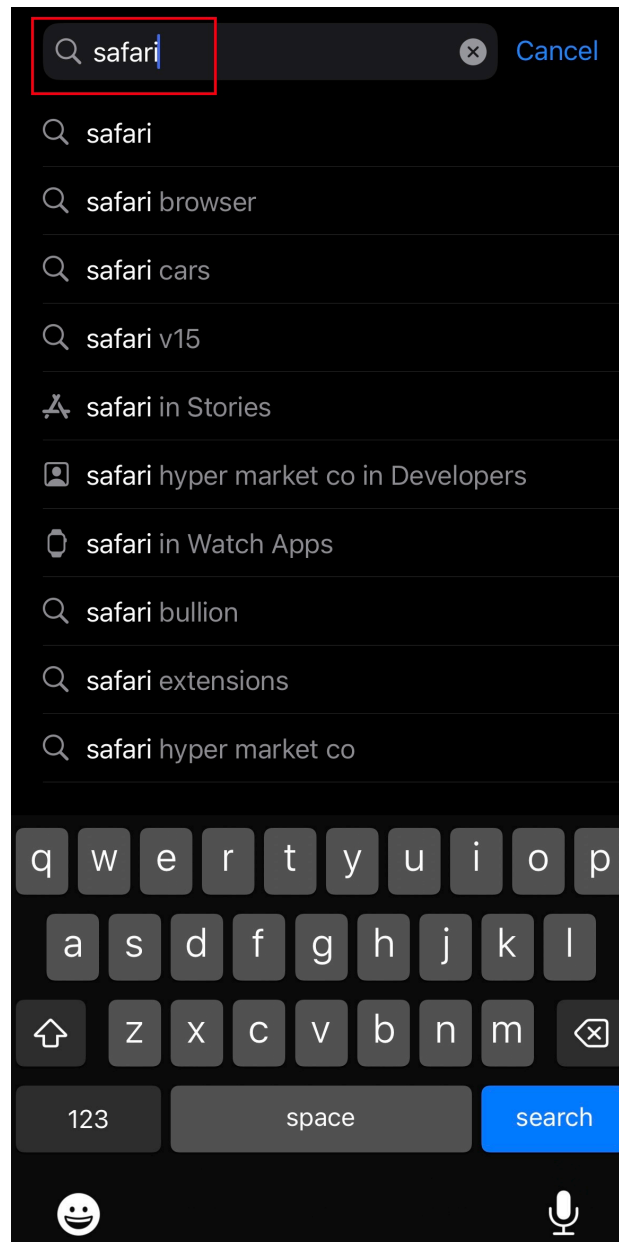

The url will be like "https://apps.apple.com/us/app/google-chrome/id535886823"

The string that succeeds the "app/" keyword is what you should input as App Name and the number that succeeds the "/id" keyword is what you should input as App Id in CustQr's Qr code generator for Appstore App

# Method 2 - Using Appstore App

## Open Appstore app in your apple device

Search your app by name

Click the share icon in your app's screen

Click on copy link option and get your App's ID from the copied link

The copied link will be like "https://
apps.apple.com/us/app/safari/id1146562112"

The string that succeeds the "app/" keyword is what you should input as App Name and the number that succeeds the "/id" keyword is what you should input as App Id in CustQr's Qr code generator for Appstore App
